

Name and Email of Gardener:	 Colorado Native Plant Society, POB 200, Fort Collins, CO 80522 conpsoffice@aol.com , www.conps.org 970-663-4085							
Name of the specific garden area by exposure/microclimate: ex: full sun/unprotected south yard; part-shade courtyard								
Soil type (before amendments added, if any):								
Common Name								
Scientific Name								
Container size:								
Where Purchased – Date of Purchase:								
Planting Information:	Already in the Garden		2018		2019		2020	
Date of planting (approximate if already in garden):								
Amendments used when planting, if any:								
Mulched? If so, what type and how much?								
How many plants of this species have been, or are being planted, in this specific area? At end of season, how many survived?	<u>Planted</u>	<u>Survived</u>	<u>Planted</u>	<u>Survived</u>	<u>Planted</u>	<u>Survived</u>	<u>Planted</u>	<u>Survived</u>
At beginning of next season, did these plants come back?								
Of the plants that died at the end of the season (or the beginning of the next season), can you pinpoint a specific reason? (slightly different microclimate than the others? May have received less water?)								
At beginning of next season, how many plants came back?								
If planted in groups, how many groupings of this plant in this specific area?								
How many plants in each grouping?								
Date of seed planting; and survival rate (low/med/high)	<u>Planted</u>	<u>Survival Rate</u>	<u>Planted</u>	<u>Survival Rate</u>	<u>Planted</u>	<u>Survival Rate</u>	<u>Planted</u>	<u>Survival Rate</u>
Brand of seed? Or hand-collected?								
Self-seeded? Approximately how many?								

Maintenance Information	Already in the Garden	2018	2019	2020
Fertilizer? Type (NPK), when, how much, how often?				
Type and level of maintenance (pruning, clean-up) Low – Medium - High				
Supplemental Irrigation – how often, how much?				
Specific damage- insect/disease/wildlife/weather				
Has this plant been invasive in this location? If so, at what rate? (low, medium, high)				
Overall condition of plant at end of season				
Phenology Stages - Dates (photos if possible)				
Initial growth (herbaceous)				
Bud-break (woodies)				
First flower buds				
Full bloom				
End of flowering				
Fruit visible				
Fruit ripe				
Fruit dispersed				
Leaf color change				
Leaf drop				
Miscellaneous Questions				
Pollinator/wildlife observation (photos if possible) Name(s) if known:				
Use in the garden (butterflies, deer resistant, screen, etc.)				
Propagation methods you've tried. Success rate?				
Successful plant combinations? (please send photos)				
Other Notes:
